

Senior PHP Developer

ABOUT US

We are a creative technology company dedicated to building relevant digital products. As a partner to mostly clients from EU, we help businesses update and improve existing products in response to new opportunities and ever-evolving market needs. Our headquarters are based in Maribor, Slovenia with business development, sales and collaborative client support experts who help clients define the development requirements and business-oriented functional tests.

Our teams deliver software solutions with the best in class methods in agile development. The development team is composed of a number of agile teams with an ever-expanding portfolio of skills. We believe in DevOps principles, infrastructure and test automation and continuous delivery. Our autonomous self-organizing agile teams deliver products reliably with high quality and in time. We combine disciplined front and back end software development practices with the right amount of architectural planning.

THE ROLE

We believe in fully owning our applications, right from writing the code, through to building and maintaining our own infrastructure using AWS and utilizing continuous deployment. We pride ourselves on building amazing teams who strive to improve by the day and enjoy taking on new challenges.

As a PHP Developer, you'll be working in an agile team delivering features to build and improve an amazing software platforms. Our teams are moving quickly and constantly improving, both in the way we work and the tools we use. If you love working with your team from the initial problem to delivering the best solution for our customers, this is for you!

The more complicated the projects you have been involved in the better; we are looking for a person with a “can do” attitude.
